AUDIO FORENSIC ANALYZER REPORT

Digital Forensic Examination of Audio Evidence

EVIDENCE INFORMATION

Field	Value
Evidence ID	EVID_20261007_234737_787640
Filename	tmpuputsa03.wav
Analysis Timestamp	2026-10-07T23:47:37.798349
File Size	11066998 bytes
MIME Type	audio/x-wav
SHA-256 Hash	216ed27656d05c7d06ae3acada8ab86116a2053f6b8e6c8df5a2b214813beba2

AUDIO PROPERTIES

Property	Value
Duration	115.28 seconds
Sample Rate	48000 Hz
Channels	1
Bit Depth	16
Bitrate	768000 bps
Codec	

METADATA ANALYSIS

Field	Value
duration	115.28075
sample_rate	48000
channels	1
bitrate	768000

bit_depth	16

WAVEFORM VISUALIZATION

Waveform visualization not available.

SPECTROGRAM VISUALIZATION

Spectrogram visualization not available.

TAMPERING ANALYSIS RESULTS

Metric	Value
Number of Windows	0
Number of Suspicious Regions	0
Maximum Anomaly Score	0.000

No significant signal discontinuities detected.

OVERALL ASSESSMENT

No significant signal discontinuities were detected by this analysis. This does not guarantee the authenticity of the audio, as sophisticated manipulation may not produce detectable discontinuities with this method.

FORENSIC DISCLAIMER

This tool provides preliminary digital forensic analysis. Detection of an anomaly does not by itself establish that an audio recording was manipulated. Findings should be corroborated using additional forensic methods and appropriate reference evidence. This analysis is intended for educational and preliminary investigative purposes only.
